UKBCSE WELCOMES TIMELY CALL TO ACTION

The Council today welcomed the publication of the latest report from the Committee on Climate Change.

David Green, Chief Executive of the Council, comments:

“This report is particularly timely – just as the scale of investment needed for the secure transition to a lower carbon future is centre stage, the Committee on Climate Change is to be congratulated on its renewed galvanising action on the climate change agenda and the reminder it has given us all of the very real steps needed to meet the carbon budget period set by Parliament.

Highlighting that the simple measures such as insulation and energy efficiency are just as important as the complex challenge of energy market reform is also welcome as we all work to successfully help people to keep their homes warm and meet the climate and energy challenges we face as a country.”

ENDS

Notes to Editors
