

Bristol Environmental Technologies & Services Partnership

BETS Partnership – A business-led support and networking grouping bringing together the private, public, academic and voluntary sectors to foster and facilitate the growth of environmental businesses in and around Bristol

Target Sectors

- renewable energy
- waste management
- recycling
- pollution control
- sustainable transport
- environmental consultancy
- specialist services

Mission

- To support the growth of a vibrant Environmental Technologies & Services industry sector in the Bristol region
- To make Bristol a leading centre in Europe for ETS and good environmental management practice
- Promote the adoption and mainstreaming of BETS solutions to build a more sustainable Bristol City-Region

Making a Difference

by delivering its objectives

- Enabling networking and collaborative projects of member companies and organisations – providing current market intelligence, knowledge transfer, access to finance, skill and training, marketing support and supply chain initiatives.
- Working with government, regional and public agencies to develop infrastructure capacity to support the expansion of the sector
- Raising the profile of Bristol as a centre of ETS excellence within the UK and Europe using the power and skills of the member organisations to lever greater success through collaboration

Programmed Delivery

- Membership driven
- Information transfer through organised events
- Networking opportunities
- Web site at centre of information flow
- Annual Conference and Expo
- Active links with organisations with similar aims
